Pilgrim Shoes is a leading US based manufacturer and distributor of diabetic therapeutic wellness footwear. We recognized the need to manufacture a shoe, that will perfectly blend with your foot biomechanics to maximize comfort, while staying fashionable and attractive.

You can find our shoe throughout the United States primarily through foot health specialists and specialty stores. Anatomically shaped lasts available in the wide range of sizes and widths, unique technology, meticulously selected materials and components guarantee the perfect fit and customer’s satisfaction. Our diabetic shoes help prevent very serious diabetic foot complications such as ulceration and possible amputation.

Meanwhile anyone who is looking for superior quality stylish comfort shoes, will find the great pair to enjoy and admire.

This is what we call “ULTIMATE COMFORT EXPERIENCE”. Pilgrim Shoes has been proudly manufacturing orthopedic footwear in the USA since 2010.

We have created a distinctive quality shoes and brought back American manufacturing jobs. Recognition of our American made footwear is growing. Pilgrim Shoes have been selected as an official supplier for Veterans Administration Contract VA797N-12-R-0012 and we are proud to serve those who have served America so well!

DESIGNED FOR ULTIMATE COMFORT

- Foam cushioned collar prevents heel slippage for a snug and friction-free fit
- Seam-free linings that are well-padded and breathable protect the foot from pressure points and abrasions
- Padded tongue minimizes lacing pressure over the instep
- Added depth in toe box and forefoot allows extra toe room and provides adequate space for use of orthotics
- DRY FAST® SYSTEM fabric for fast moisture-wicking to keep your feet dry
- Removable triple density insole with microfiber cover wicks moisture away from the foot
- Shoes are available in three different widths, full and half sizes for better fit
- Added shaft height allows for better fitting of any kind of orthotics or braces
- Extended medial heel counter provides rear foot walking stability and minimizes slippage
- Extra wide lightweight midfoot stabilizer to prevent overpronation and increase stability throughout the shoe
- Built-in curvature for arch support (lasts H26635A and D34278, H28435)
- Our double rocker outsole supports a natural rolling foot motion and assures safe moving (lasts H26635A and D34278, H28435). Outsole can be modified if needed
**Heel Cradle System™**

This exclusive feature allows for outward expansion in the heel area of the outsole providing for more lateral and medial stability as well as excellent shock absorption. This extra stability spares the joints and protects the knees, hips and spine.

**Unique Last Construction**

Specially developed last with its anatomically shaped contoured bottom and heel cup creates a roomy toe area to accommodate foot deformities and a snug heel area to enhance stability. Toe box height is 1-1/8” with removable inserts in place.

**Hidden Depth**

By using durable direct injection technology we are able to make our footwear more esthetically pleasing by hiding some part of the extra depth in the body of the outsole. This also achieved by use of strobel construction, which helps to eliminate extra layers of cardboard.

**Stretchable leather upper**

Our signature genuine leather stretchable uppers provide superior comfort by accommodating forefoot deformities while featuring leather durability and outstanding air circulation to maintain healthy in-shoe climate.

**Extra light weight**

Use of exclusively formulated materials for outsoles as well as unique uppers constructions provides for almost weightless shoe experience.

**Waterproof**

Quality materials provide for shedding and sealing out external moisture while allowing perspiration to escape for optimal foot comfort and waterproof performance.
Our double depth collection designed to help diabetic patients to prevent possible serious complications and help other patients with orthopedic needs by providing an extra depth.

All shoes in this collection are coming in at least three different widths and wide range of full and half sizes. Shoes in this collection include all important built-in features critical for successful management of diabetic foot and treatments of other foot problem.

Double depth collection shoes are made in our Baltimore, MD USA factory with finest components, featuring virtually seamless construction and extra depth of at least ½” to accommodate any custom or over the counter orthotics.

Our shoes not just fit right, but look so great that they will become your favorite pair of shoes. All of our shoes have been reviewed by PDAC as A5500 for diabetic patients and as L3215–L3122 for orthopedic needs.
